

Brunswick	
Exploration	
General information	
Metal	Li
Location	Throughout CDN
How many projects	Hundreds (is a numbers game)
Phase	Early / grassroots
Historic district	Partially yes
	Eleonore (St James Bay) (gold mine) Allkem Anatacau deposit hosts 40 million tonnes Indicated at 1.4% Li ₂ O (lithium oxide) and reserves of 37Mt at 1.3%
Producing mines nearby	Li ₂ O
Advanced exploration nearby	Advanced Exploration; numerous proven & probable (James Bay) + Patriot Battery (Corvette)
Management	
Success of management	Yes, esp. Through Osisko
Special experience in metal	Not visible
Local experience	Yes (Exploration Mngr = James Bay)
Infrastructure	
Infrastructure available	Yes
If not, available nearby	Yes
Water situation	No issue
ESG	
Country	CDN
Political situation	No issue
Negative mining issues?	None
Environmental & social aspects	None identified
Is mining being supported politically	Yes
District & technical projects aspects	
Historic district	Yes (but Li secondary metal)
Historic assays	No
If yes, which results GT > 200, or >250 when deep (for gold) Gold or gold equivalent at least 0,75g/t?	
Deposit quality above average?	No data yet

Drilling planned	Yes, for Hearst (Decoy Pegmatite) Yes for Anatacau West (James Bay)
Money available to do this	Yes, for Hearst (Decoy Pegmatite) Yes for Anatacau West (James Bay)
Resource open?	No data yet
Strategic district or, ist the district of interest to a major?	Yes; Patriot Battery could take over Mythril; Plex Also Allkem (former Galaxy) is operating nearby Personal linkages to Osisko

Financial aspects

Market cap	€ 90mio
Financing partners (banks, OEM, majors)	Osisko Goup
Share distribution/ Insider ownership	Yes, top mnngt hold substantial shares
IRR > 20?	
Market cap to value of resource/reserve	No data yet
Value per ounce	No data yet
Profit	No data yet
